Detailed Forensic Reports and Expert Witness Testimony

FORENSIC SERVICES SUCCESS STORY

Making the Case for ShotSpotter Forensic Services

SITUATION

Building and presenting a compelling case in a shooting trial can be complicated and challenging, but a case can be significantly strengthened with forensic evidence that fills in the details such as: exact time, location, and sequence of shots fired. Without the right data, investigators can be stalled when trying to examine critical evidence and fully understand all aspects of a shooting incident. For the prosecutor, proving a shooting case can be tenuous without rock solid testimony that eliminates confusion, verifies details, and helps the jury come to the right conclusion.

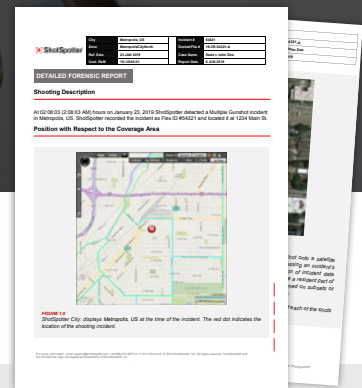

APPROACH

The Detailed Forensic Report (DFR) is a court-admissible analysis of a shooting incident captured by the ShotSpotter system that is produced by forensic engineers. It provides critical details of, when, and where the shooting incident occurred.

200 Cases supported by testimony from Expert Witness Services

1,500+ DFRs produced for attorneys that bolster investigations and strengthen cases

Expert Witness testimony of the DFR bolsters the presentation of a case and assists in the trial. A ShotSpotter forensic expert presents the ShotSpotter evidence to the jury and this combination has been successfully admitted in over 200 court cases in 20 states including the District of Columbia.
