

THE FIRST END-TO-END PRECISION POLICING PLATFORM™

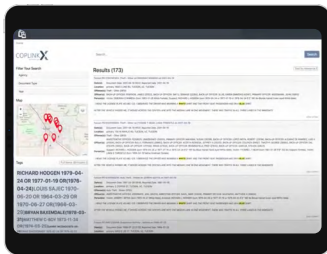

Data-Driven Tools for More Efficient, Effective and Equitable Public Safety Outcomes

#1 GUNSHOT DETECTION SERVICE FOR CITIES AND COUNTIES

ShotSpotter Respond™

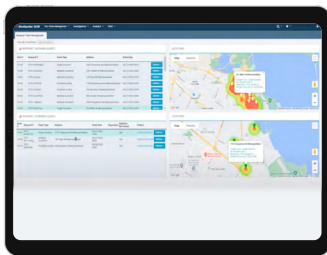

ShotSpotter Respond detects, locates and alerts police to gunfire in less than 60 seconds using a network of acoustic sensors across a coverage area. This enables police to provide a consistent, rapid and precise response to aid victims, collect evidence and better serve their communities.

#1 SEARCH ENGINE FOR INVESTIGATIVE LEADS

COPLINK X™

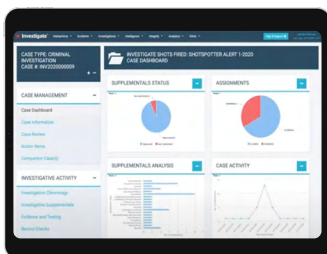

COPLINK X is a proven tool used by more than 2,500 agencies to generate leads and accelerate investigations. It enables investigators, supervisors, and patrol officers to search more than 1 billion records across jurisdictions to identify persons of interest, uncover relationships between people, places, property, and events, and give patrol officers better situational awareness.

NIBIN LEAD MANAGEMENT

ShotSpotter GCM™ (Gun Crime Management)

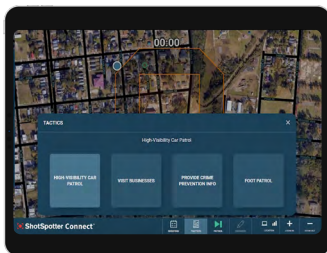

ShotSpotter GCM automates input of NIBIN leads, leverages digital link analysis to immediately identify associated gun crime cases, prioritizes and tracks cases, and delivers reports that drive operational insight. The platform acts as a force multiplier, enabling agencies to more effectively investigate gun crimes.

CASE MANAGEMENT

ShotSpotter Investigate™

ShotSpotter Investigate is a cloud-based case management solution that helps law enforcement agencies collaborate on investigations in one place. The platform's investigative, analytic and reporting tools make detectives more efficient and effective. As a result, law enforcement agencies of any size can better protect the community and achieve higher clearance rates.

PATROL MANAGEMENT

ShotSpotter Connect™

ShotSpotter Connect is a patrol management solution that uses artificial intelligence and objective, community-specific data to ensure officers are in the locations with the highest risk of crime for a particular day and time. It helps minimize over-policing, provides visibility into officer activity and helps create a greater crime deterrent effect with fewer officers.

Security Solutions

ShotSpotter security solutions such as SiteSecure™ and SecureCampus® provide outdoor gunshot detection on highways and campuses to protect commuters, students, staff and visitors from active shooters and neighborhood gun violence. The system provides notification of an event along with a precise location in less than 60 seconds, enabling law enforcement and security to mitigate the threat and direct people to safety.

ShotSpotter Labs

ShotSpotter Labs develops innovative uses of gunshot detection technology to help protect wildlife and the environment. ShotSpotter gunshot detection is deployed in Kruger Park, South Africa, home to the largest remaining population of protected rhino, and has helped reduce poaching.

Leadership Team

Ralph A. Clark
President & Chief Executive Officer

Alan R. Stewart
Chief Financial Officer

Paul Ames
Senior Vice President, Products & Technology
